Amir Rezgui

Software Engineering Student

Ariana, Menzah 6 | amir.rezgui.pro@gmail.com | +216 25486290 | linkedin.com/in/amir-rezgui | amir-rezgui.github.io

PROFILE

Software engineering student, seeking a final-year internship to apply my skills through real and innovative projects.

PROFESSIONAL EXPERIENCE

Generative AI and Web Development Internship – Linkup Solutions **07/2026 - 08/2026**

Designed and developed Linkup Recruiting, a SaaS recruitment platform featuring intelligent LLM-based CV analysis, candidate evaluation and an AI conversational assistant for recruiters.

Stack: React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Redis, BullMQ, Mistral AI, Ollama.

Summer Web Development Internship – Nextira **06/2025 - 08/2025**

Developed and customized a call center web application integrated with VICIdial to manage call flows, campaigns and agent interfaces.

Stack: PHP, MySQL, REST API, jQuery, VICIdial.

Bachelor's Final-Year Mobile Development Internship – Kroschu **02/2024 - 06/2024**

Designed and developed a cross-platform mobile application for managing internal workflows.

Stack: Flutter, Dart, Firebase.

EDUCATION

Software Engineering Degree (Engineering Cycle) **09/2024 - present**

Higher Institute of Computer Science (ISI) Ariana

Bachelor's Degree in Computer Science - High Honors (16/20) **10/2021 - 06/2024**

Higher Institute of Computer Science (ISI) Ariana

Baccalaureate in Computer Science - High Honors (17/20) **09/2020 - 06/2021**

Khayreddine High School

PROJECTS

Intelligent Hospital Emergency Management System **05/2026**

Developed an intelligent web and mobile platform for medical emergency management featuring automatic incident classification, smart ambulance dispatch, hospital recommendation and a first-aid assistance chatbot.

Stack: Spring Boot, Angular, Flutter, Camunda BPMN/DMN, Keycloak, Dialogflow, PostgreSQL.

Real-Time Quiz Mobile Application **04/2026**

Developed a live quiz mobile application featuring AI-based quiz generation, session access via PIN code or QR code, real-time answer synchronization and a dynamic player leaderboard.

Stack: Flutter, Supabase, PostgreSQL.

Intelligent Real-Time Demographic Profiling IoT System **02/2026**

Developed an IoT system for real-time face detection and demographic analysis on a Raspberry Pi board, with cloud storage and an interactive statistics dashboard.

Stack: Python, Hugging Face Transformers, MTCNN, OpenCV, Firebase.

SKILLS

Languages: Python, Java, JavaScript, TypeScript, C, C++, Dart, PHP
Backend: Node.js, Express.js, REST APIs, Microservices, Spring Boot, Prisma, Redis, BullMQ, Keycloak
Frontend: React.js, Angular, Flutter, Tailwind CSS
AI and ML: PyTorch, Scikit-learn, LLM Integration, Prompt Engineering, Mistral AI, Ollama, OpenCV
Databases: Supabase, PostgreSQL, MongoDB, MySQL, SQLite, Firebase
DevOps and Tools: Git, GitHub, Docker, Jira, Postman, Camunda

CERTIFICATIONS

Google Foundations of Project Management **02/2026**
CDOSS Artificial Intelligence and Machine Learning Fundamentals **12/2025**
Cisco Data Analytics Essentials **11/2025**
CDOSS Python for Data Science **05/2025**
